

- ❑ Customers and Suppliers Management Information System
- ❑ Catalog in up to 3 languages: French, English and Arabic
- ❑ Items consignment Management
- ❑ Automation of Contracts with owners (consignees)
- ❑ Auction Day Automation (generation of vouchers and receipts with posting to Accounting System)
- ❑ Modern Web site as a powerful marketing tool
- ❑ Integrated e-Auction (Optional)

**Intellisoft Auction** is a comprehensive IT solution for Auction Automation Management. It handles all auction operations from handling consignments and preparation of the catalogue to the sales and collection. It works off-line and on-line. It comes in three independent packages plus an Integrator that integrates all parts together making all a one unique system.

### Part I – Intellisoft Auction Back-Office

It handles all internal operations such as:

- ❑ suppliers and customers contact management,
- ❑ preparation of the auction (consignment, contracts, data entry of the items in up to 3 languages, pricing and issuing the catalogue of the auction
- ❑ Handling the sales operations during the auction and Follow up
- ❑ Auction Accounting

### Part II. Intellisoft Auction Website

It is the Web site of the company who organizes the auction. Beside the general parts, it has two components:

- ❑ **The Gallery** where permanent items for sales are exposed,
- ❑ **The Auction** where information about the items of the bid are shown. This includes description of the item in 1 to 3 languages: English, French and Arabic, its price and one or more pictures

### Part III. Intellisoft Integrator

It handles:

- ❑ Data exchange and synchronization between all the system parts
- ❑ Catalogue upload from back office to the web site
- ❑ Store and Events
- ❑ e-Auction and integration with system data base

### Part IV. Intellisoft e-Auction

It handles sales over the web. This part is released on customer demand
