Implementation Service

Our implementation methodology is based on key project planning elements such as: goal-directed, planned, evaluated and result-oriented. The implementation will follow three 'Phases' which are:

- ❑ Mapping of customer business processes to the proposed System
- ❑ Piloting: Comprehensive process testing and training in real data test company.
- ❑ Migration: Complete simulation of the use of the proposed software

Technology

IntelliSoft has adopted Microsoft to be the infrastructure of its solutions development. We develop Windows-based as well as Web-based solutions using advanced technologies provided by Visual studio, SQL Server, and Microsoft development tools.
